

New Membership System: Little Green Light

In the fall of 2021 Newton Conservators converted to the constituent and donation tracking system “Little Green Light” (LGL). In addition to being less costly than our previous system, it also is better integrated with our website, which allows a more streamlined support of such things as Trail Guide and Almanac ordering and has numerous other features.

LGL does not allow individual access to view or update membership information (a practice which tends to result in varying email addresses being used and duplicate membership records). Instead, if you have any questions about your membership, you will need to email us: membership@newtonconservators.org, and we’ll be happy to look up the info and get it to you.

We are also starting to make more use of automated responses and tax acknowledgements by email. This has

always been the case with credit card transactions. Now we are also doing it whenever possible for payments made by check. However, if a donor’s record shows that they did not opt in to receive emails from us, we still send a hard copy acknowledgement. Emailed acknowledgments come from “info@newtonconservators.org.” There will not be any additional year-end tax acknowledgement reports sent, but if you can’t find the email or need more information, please contact us. Also, if you received a hard copy acknowledgement but would be just as happy to get it by email in the future, please let us know and we can change your opt-in status.

If you have any questions about your membership or suggestions, please contact us at membership@newtonconservators.org. Thanks! ♦

🌿 Bird Drawings by Suzette Durso 🌿
