Black swallow-wort pods in summer and fall

Carolyn van der Laan

Black swallow-wort flowers

The work of our invasives team continues. We will do sessions twice weekly, generally Monday and Saturday mornings. Join us if you want some fun and educational work! Email the address shown below.

It is now prime black swallow-wort (BSW) season. Please be on the lookout for this vine, a non-native invader infesting Newton, often hiding in hedges and shrubs. It reduces biodiversity and degrades our local environment, and, sadly, is fatal to monarch butterflies. Right now, it has bloomed (small purple flowers), and the large seed pods have formed. Starting soon the pods will dry and open, and the wind will disperse the seeds on white fibers to make the infestation even worse. The BSW vine has blue-green, glossy, opposite leaves, small purple flowers, and large seed pods that hang down like pea pods. (See our website for many other photos.) You can dig it up, cut it down, or just pull off the seed pods to prevent further spread. Put everything into a bag and into your trash, not into yard waste, to avoid further spread. For more photos and information about this and other common invasive species in Newton, see the invasive plant information on our website (listed under Resources), such as this link for BSW: <https://newtonconservators.org/black-swallow-wort/>

Newton Conservators conducts many work sessions in spring and fall to protect Newton's open spaces and manage invasive species. If you would like to be on the email list for notices of our group activities, please email Invasives@newtonconservators.org. Thank you! ♦

Get Involved with the Conservators - Volunteers Needed

The Newton Conservators needs volunteers to help with various activities, including annual monitoring of the conservation restrictions we hold on City of Newton properties, pulling invasive plants, updating our inventory of plants and animals on Newton's public lands, and collecting new signups from interested Newton residents on our walks or at community events such as Village Days, the Harvest Fest, and others. You'll work alongside and be trained as needed by experienced Conservators' board members. If you're willing to volunteer for a couple of hours, it would be most appreciated. Please send an email to: president@newtonconservators.org and someone will contact you. Additional volunteer opportunities are listed on our website.

Thank you.

MISSION Newton Conservators, Inc.

The Newton Conservators promotes the protection and preservation of natural areas, including parks, playgrounds, forests, and streams which are open or may be converted to open space for the enjoyment and benefit of the people of Newton. It further aims to disseminate information about these and other environmental matters.

A primary goal is to foster the acquisition of land, buildings, and other facilities to be used for the encouragement of scientific, educational, recreational, literary, and other public pursuits that will promote good citizenship and the general welfare of the people of our community.

Newton Conservators was formed as a not-for-profit organization 62 years ago in June 1961.

The Newton Conservators' Newsletter® is published four times each year by the Newton Conservators, Inc., in June, September, December, and March. Deadlines for these issues are the second Friday of the month before the issue is published.

We welcome material related to our mission from any source. Send proposed articles or letters by email in MS Word or rich text format to articles@newtonconservators.org. Digitized photographs, maps, and diagrams are also welcome.
